

WELCOME TO THREEFOLD A P2P INTERNET

We created software to power small, very trustworthy nodes that run a better Internet. Everyone can easily host them.

- Our operating system ZeroOS does not respond to mouse or keyboard input
- Data is split between multiple physical storage locations
- End-to-end protection inside the hardware creates a silicon route of trust.
- Workloads are managed by a 'Smart Contract for IT' that provides Blockchain-like security and reliability

These nodes form the ThreeFold Grid, the largest network of decentralized storage and compute on the planet.

- Over 80 Million Gigabytes of existing storage
- Over 20k CPU cores
- Distributed in 21+ countries
- Passive income from just running hardware

Any software that runs on the ThreeFold Grid is decentralized and secure.

- A better alternative to centralized, intransparent and power-hungry data centers
- 100% data ownership
- Blockchain like reliability for cloud capacity
- Decentralizes every hosted application
- Fully compatible with market standards Kubernetes & Docker

EXPERIENCE COUNTS

Data reduction and capacity optimization software for disk-based backup

ACQUIRED BY
VERITAS

Managed dedicated hosting services for complex Internet infrastructures

ACQUIRED BY
terremark verizon

Belgium's largest hosting company

ACQUIRED BY
telenet

Automation of cloud computing deployment, full data center virtualization

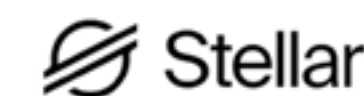

ACQUIRED BY
Sun
microsystems

Object storage software for public and private cloud data centers

ACQUIRED BY
HGST

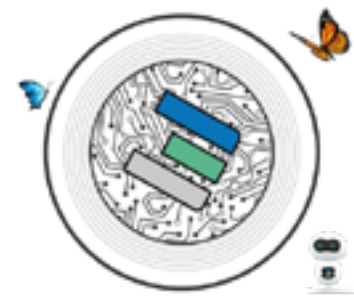

PARTNERS & USE CASES

THE THREEFOLD TOKEN - TFT

CIRCULAR ECONOMY

The ThreeFold Token is the currency of the new Internet. It is a decentralized digital currency that represents a unit of reservation of capacity (compute, storage) on the largest active peer-to-peer network of capacity on earth - the ThreeFold Grid. This new Internet is enabled by independent farmers, that connect hardware from all around the world in return for TFTs.

INTRINSIC VALUE

Each TFT represents underlying Internet capacity and can be exchanged for that capacity at any time. It is the exclusive medium of exchange for Internet capacity on the ThreeFold Grid.

DECENTRALIZED ISSUANCE

TFTs are exclusively generated when new capacity is added to the ThreeFold Grid. There are no centralized issuers. Tokens have not been created out of thin air, no ICO/IEO ever took place.

LIMITED SUPPLY

A maximum of 4 billion TFT can ever be created. This limit ensures stakeholders are incentivized and rewarded through both the short and long terms.

LIVES ON STELLAR

TFT lives on the Stellar Blockchain. TFT holders benefit from a big ecosystem of proven wallets and mediums of exchange. Stellar's mission to promote financial inclusion is aligned with the ThreeFold's vision for an inclusive Internet.

SUSTAINABLE

By employing Stellar technology, TFT transactions and smart contracts are powered by one of the most energy-efficient blockchains available.

FUELING IMPACT

By buying, holding, and utilizing TFTs, you are actively supporting the expansion of the ThreeFold Grid and its use cases - creating a more sustainable, fair, and equally accessible Internet.
