

PEER 2 PEER & GLOCAL

COMMODITY TOKEN PLATFORM

# MITAA

Bringing fairness, security and scalability to digital commerce. MITAA platform is an easy-to-use and open-source digital currency and marketplace system that allows you to exchange currencies, goods and services in a peer-to-peer, fully secure way.

## Our mission

We believe that everyone has the right to a free and open peer2peer platform that enables a fair exchange of value.

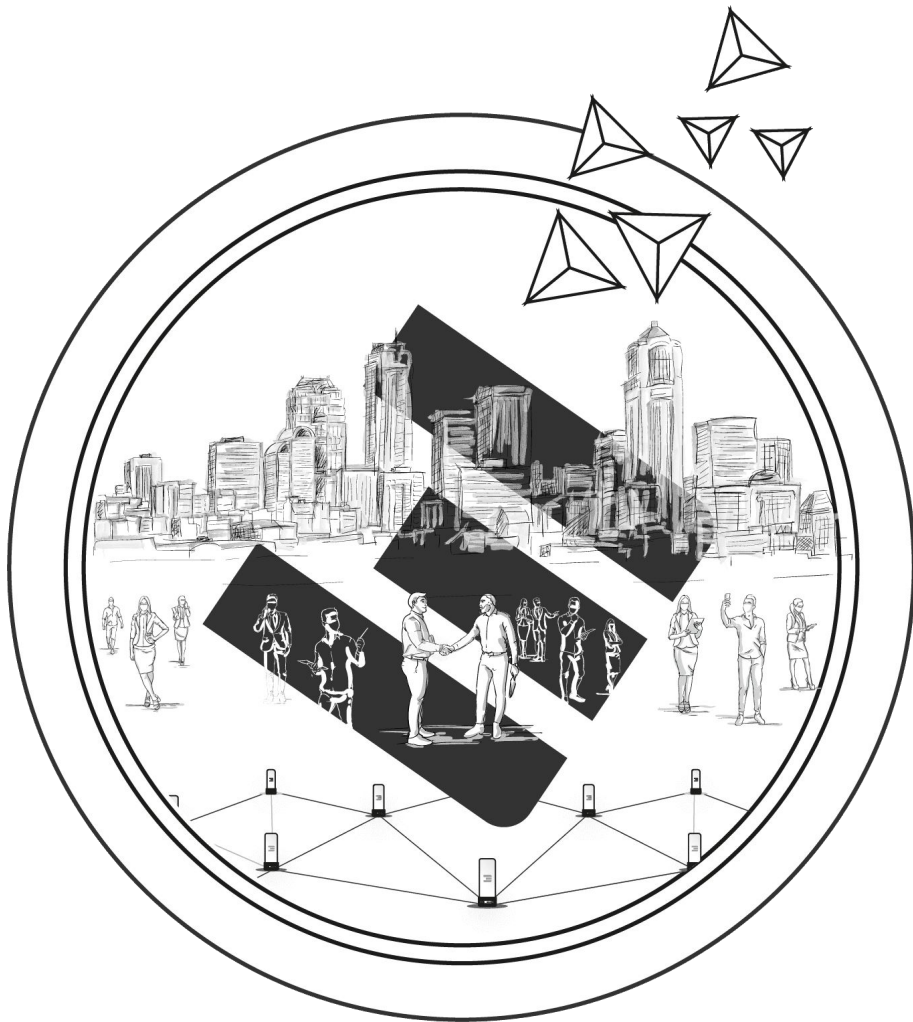

A system without abuse & trust issues.

# The problem

**We don't need centralized parties in digital commerce — yet they keep becoming more powerful every day.**

Promising projects with new tokens encounter many barriers and excessive costs to launch and exchange listing

- **No sovereignty or control**  
Centralized exchanges and wallets have custody of funds and require middlemen
- **Huge security and data privacy issues**  
Large exchanges are easy targets for hacks with little recourse or protection
- **Market manipulation and no transparency**  
Fake volumes and market-making, algorithmic trading
- **Complexity and lack of information**  
Hard to navigate exchanges, complicated eCommerce systems, ...
- **Not enough interoperability**  
Existing platforms seek to lock in users to their own ecosystems

**THE NEW GLOBAL  
IS LOCAL**

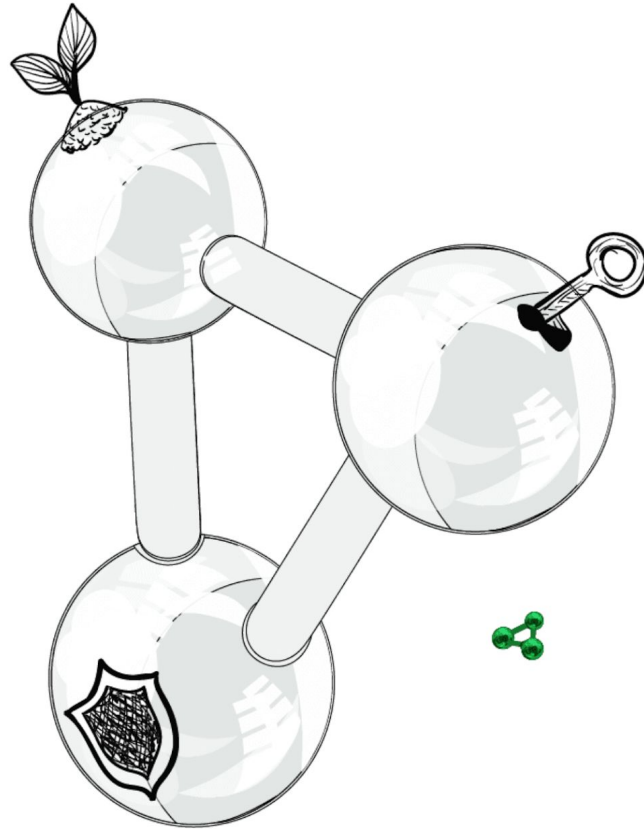

# The solution

Open-source, peer-to-peer digital currency and market place platform that are ultra safe and built on peer2peer digital twin technology, available to everyone everywhere.

# The Power of P2P

Today, online privacy and security are compromised. Peer-to-Peer models empower communities with equality, sovereignty and resilience.

# Finally you can be fully private and secure!

The Digital Twin assures that only you own your data, and no one else. Access numerous applications while forever remaining fully secure, private and anonymous.

**CENTRALIZED**

**PEER to PEER**

sovereign secure digital inclusion fair  
sustainable green endless possibilities no marketing

# Set Yourself Free with the Digital Twin.

Start getting accustomed to newer apps designed to secure your online existence.

## RELIABLE

An architecture that guarantees the privacy of your data.

## EMPOWERING

Share your data with anyone you specify – or no one. Unshare it anytime.

## EFFICIENT

Your data is saved only once. It is not stored by the parties you share it with.

# A World Without the Digital Twin

Countless attacks and countless victims.

**\$6 TRILLION**

Cybercrime is estimated to cost the world \$6 trillion annually by 2021.

**11 SEC**

It is estimated that a business will fall victim to a ransomware attack every 11 seconds.

24% of data breaches are caused by human error.

Cyber-attacks are considered among the top five risks to global stability.

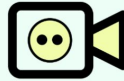

This can be stopped. The Digital Twin has one mission: to keep your online identity safe.

# ADDITIONAL FEATURES OF DIGITAL TWIN

Planetary Secure Network

## VIDEO CALLS

Achieve end-to-end encryption like never before with the first P2P video calling application.

## FILE STORAGE

Rest assured that all your documents and files are stored in a truly decentralized space, allowing an unprecedented amount of security.

## CHAT

Privacy has a new standard. The Digital Twin chat feature allows a level of discretion never achieved before.

## OFFICE

All that you would expect from a professional program to make your life easier, plus the added security.

## WEB PUBLISHER

Express yourself to millions while allowing yourself the pleasure of fully owning every written word.

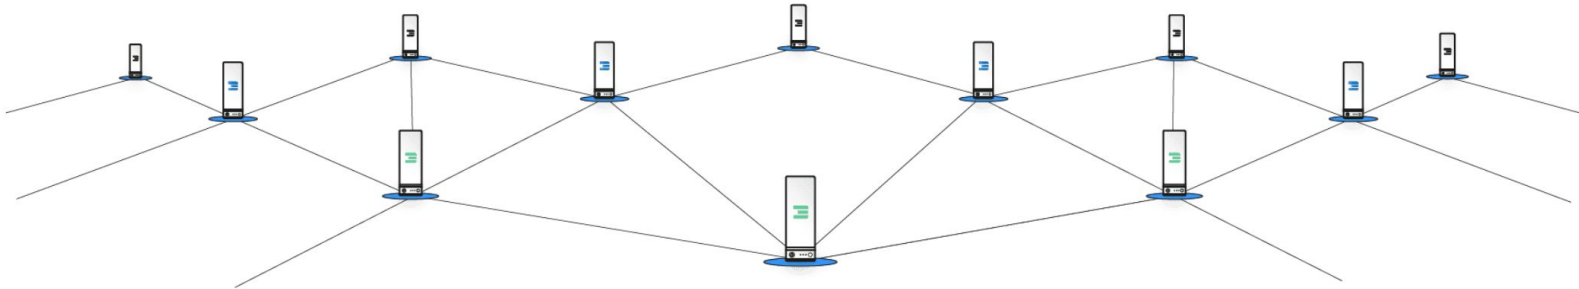

## PAYMENTS

Transact using the power of a peer-to-peer grid which gives an added level of security whilst maintaining the utmost level of privacy.

# Made Possible by the ThreeFold Grid

The ThreeFold Grid is a globally-distributed network of storage and compute capacity which brings a smart, secure and efficient solution that allows anyone to connect capacity and participate in the internet economy. It is what allows your data and workloads to live freely, privately and securely.

# MITAA FAIRSWAP SYSTEM

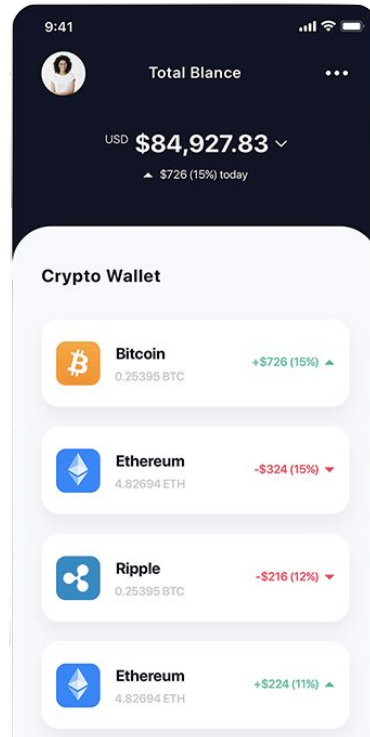

- Built on peer2peer cloud/internet capacity (the new ThreeFold Internet)
  - P2P cross-chain swaps through FinTwin technology
  - Open source protocol
  - Capable to support all required cryptocurrencies
  - Users have full custody and control over their assets (sovereign)
  - Easy to use, no complex onboarding or order books
  - Significantly reduced listing and regulatory costs/hurdles
  - Super capable smart contract layer
  - Dual Chain = money blockchain + smart contract consensus chain
  - Infinite scalability
- 

# FairWallet

**The 1st 100% open-source,  
multi chain digital wallet available today**

FairWallet provides very simple user interface, without the need to manage bids and asks, order books, trading pairs etc.

The user interface is simple enough to any newcomer to start using it. All underlying complexity is managed by FinancialTwin instance individually and securely tied to a specific user.

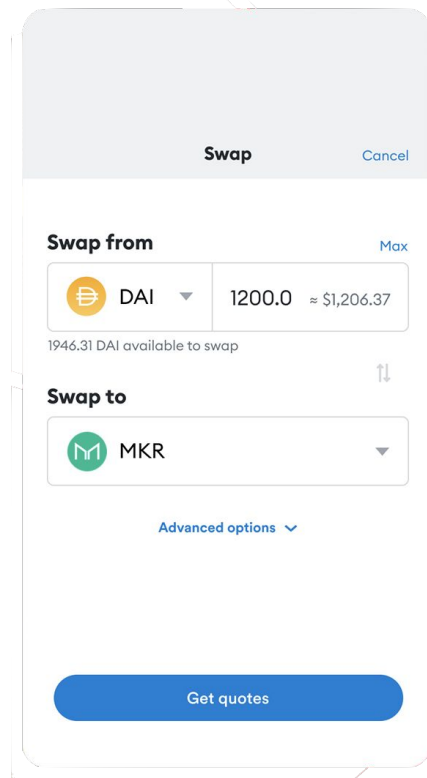

# FairExchange

## A secure, private peer-to-peer value swap system that's easy to use

A DEX built for simplicity. Instantly swap any digital currencies without orderbooks or liquidity issues.

Interoperable with secure, off-chain transactions that provide security and privacy with zero exchange fees.

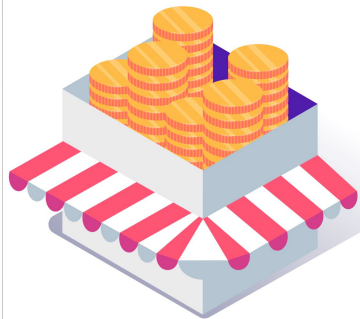

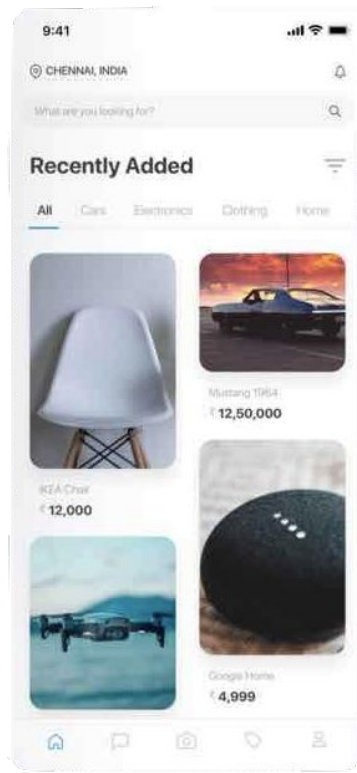

The image shows a mobile application interface for a peer-to-peer swap system. At the top, there's a header with the word "Swap" and a "Cancel" button. Below this, the "Swap from" section shows a selection of "DAI" with a coin icon, a value of "1200.0", and an approximate value of "≈ \$1,206.37". A note below indicates "1946.31 DAI available to swap". The "Swap to" section shows a selection of "MKR" with a coin icon. There's a double-headed arrow icon between the two sections. Below the "Swap to" section, there's a link for "Advanced options". At the bottom, there's a large blue button labeled "Get quotes".

# FairMarketplace

## A global peer-to-peer marketplace for goods and services

List anything, find anything. FairMarketplace uses a built-in reputation system tied to each individual identity to facilitate mutual trust on the platform.

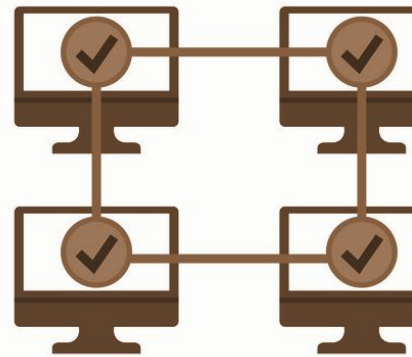

# Technology

## FairProtocol

An open public protocol for peer-2-peer interaction, running on a decentralized edge cloud that ensures privacy, security and reliability for true and trusted digital transactions.

## FinTwin (Financial Twin)

Financial Twin (FinTwin) is a virtual bot that manages all your financial data and digital reputation in a secure and autonomous manner. FinTwin is built using ThreeFold's Digital Twin framework.

# Founding Partners

**We are looking for a select group of partners to become an equal shareholder in this company.**

**The tech is currently in beta and set to be released in H2 2021.**

- 9 Founding Partners
- \$100K Contribution Each
- Swiss Company (exists)
- Priority wallet/exchange listing
- Help promote decentralization and financial independence
- Own 1/9 of company.

# CUSTOMERS

## STANDARD

- 10k (\*) /month EUR (all in)
- No exchange or transaction fees.
- Examples:  
Spinn, ThreeFold, Ubuntu Capital, ...

## SOFT STARTER

- Free until business breakeven and cashflow positive
- Only for doing good projects.
- Examples:  
TAG, Cultivo, DigitalTwin...

(\*) starting fee, can go up if volumes become really big.

## INCLUDED:

- Digital Currency Creation.
- Personal Proof Of Authority Smart Contract Blockchain.
- Smart Contracts.
- Listing on chosen money blockchain.
- Wallet for desktop, web, mobile.
- P2P Exchange.
- eCommerce backend.
- Fair-Market backend.
- Listing on 1-3 DEFI exchanges.
- Integration in Digital Twin
- Access to all knowledge in company.
- All upcoming features

team will be working on.

# Roadmap

Q4 2020

- Basic tech available.
- Company created.

Q1 2021

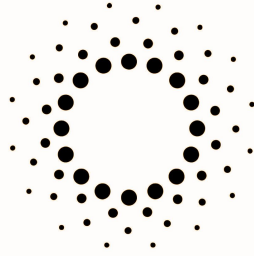

- Fair Wallet v1
- 2 Founding Members
- 5 Customers

Q2 2021

- 5 projects launched.
- FairExchange v0.9
- Digital Twin Launch
- Desktop/Web wallet.
- Backend for eCommerce
- Fair-Market Backend v0.9

Q4 2021

- 10K Wallet Accounts
- 9 Founding Members
- 10+ currencies available
- All features delivered

# THREEFOLD

## AN INTERNET THAT EMPOWERS EQUALITY, AUTONOMY, AND SUSTAINABILITY

An open ecosystem. Game-changing technology. Distributed in 21 countries and expanding.

# WHAT IS CULTIVO?

In the tropical rainforest of southern Costa Rica, Cultivo along with BiolleyFarms the coop agricultural company in Costa Rica, carries out and promotes **reforestation and organic food forest farming**, using regenerative methods and practices in close harmony with the natural environment while **providing sustainable livelihoods** and **access to responsible digital technologies** for farmers and rural communities.

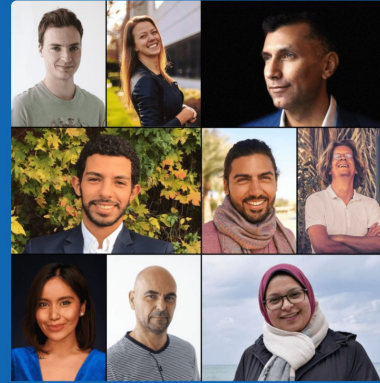

## IF NOT NOW, WHEN? IF NOT US, WHO?

We believe in digital freedom, equal opportunities for all, and sustainable solutions for our planet. We are building a new internet that serves people and our planet.

[Meet Us](#)

### PRIVACY

A tamper-proof experience that allows security to coexist with efficiency.

### EQUALITY

Scaleable everywhere and to everyone.

### SUSTAINABILITY

We have no choice but to rethink our resource consumption if we want to save our planet.
